

Technical requirements « Nosferau High Wire Walker »

Cie Altitude

- Show for one high wire walker, one comedian/technician, 1 stage director and 1 tour manager for an audience between 200 and 2000 persons.

The show takes place on the autonomous trailer, the mobifil.

The organizer has to check the access to the place of show for a truck and a trailer (= 18 meters long). He has to prepare parking places for the truck and the trailer near the place of show, near restaurants and hotel.

- Setting up of the Mobifil:

The mobifil will have to be securised on the place of the show.

Place of the show:

If it's possible, please send us some photos of the place several weeks before.

Space used by the mobifil (unfolded):

18 meters long x 18 meters width x 10 or 12 meters high

Weight: 3,500 tones

The organizer has to check that the Cie Altitude can fix the Cavaletti Rope in the ground with two big "nails" (please see technical requirements for the mobifil). If it's not possible, he will provide 2 weights, 500 Kg each one, that will be placed 1 hour before the setting up under the direction of Didier Pasquette.

- The organizer will make available for the Cie Altitude:
 - 1 technician to help the setting up and for the taking down of the mobifil
 - 1 technician responsible of the place of the show
 - 1 technician responsible of the lighting during the show (if the show takes place by night)
- Time of setting up: 2 hours
Time to take down: 1h30, 30 minutes after the show.

The organizer has to prepare light for the taking down (in case of taking down by night).

- Technical requirements:

Sound: 1 sound-system (the Cie Altitude only comes with a CD music)

Light: 1 Follow Spot (ex: 1200 W Mini)

Dressing Room (pour 2 persons):

Heated and near the place of the show, with mirror, chair and table, water, coffee and biscuits.

The Cie Altitude arrives the day before and comes back the day after the day of the show.

The organizer takes care of food (lunch and dinner, hot meals) for 4 persons from the arrival to the return of the Cie Altitude, and takes care of habitations (single rooms, breakfasts included) from the arrival to the return of the Cie Altitude.

These technical requirements make part of the contract.
